**MUNIQ - CREATE THE LIGHT YOU WANT**  
**Elegant, modular Wall light**

"It essentially consists of three components that can be combined to meet personal preferences and requirements. The extruded aluminium wall bracket and lamp head are the basic components. Here, the customer can choose either a high-gloss chrome or a finely polished, aluminium matt surface. "...> [read more](#)

BULB QT18 B15D

**BRUCK Statement on the banning of incandescent bulbs and QT 18 ECO with base B15d.**

In September 2016, a further important stage in the European energy efficiency class regulation enters into force. After this date, fundamentally only illuminants of energy efficiency class A, such as fluorescent lamps, LED and metal-halide lamps as well as energy efficiency class B, such as 12V eco halogen illuminants will be allowed.

As an exception, 230V eco halogen illuminants with G9 or R7s base of energy efficiency class C will still be allowed. Due to their special design, no replacement with energy efficient models is available for these lights.

In 2014, this scheme is to be reassessed by the EU Commission in the framework of a review. As a result, it is expected that 230V eco halogen lamps with B15d base and energy efficiency class C will also be permitted. In this case, the illuminants will also be available after 2016. However, to make sure that all Bruck lights with a B15d base can be operated after 2016, Bruck will be offering an adapter for a B15d to a G9 base. These lights will then also be operable with a QT14 illuminant\* for a G9 base.

In future, Bruck will mainly develop lights for energy-efficient and brilliant illuminants such as LED, 12V eco halogen lamps and 230V eco halogen lamps. Thus, also in future, illumination with Bruck lighting will be energy efficient, atmospheric and future-proof.

\*QT14 illuminants with G9 base are currently available up to max. 60W with energy efficiency class C. QT18 illuminants with B15d base are available with 100W and more. If, contrary to expectations, the industry will offer higher power levels for the QT14 illuminants with G9 base.

**Lamp recommendation for Muniq wall luminaire with B15d socket.**

Different lengths of QT18 lamps with B15d socket are available on the market. The existing wall luminaire Muniq with B15d socket is designed for the long version. This ensures harmonious illumination of the wall without large areas of shadow. The short lamp holder of the QT18 lamp casts unwanted shadows on the wall. Therefore, we recommend the long QT18 lamp for good illumination of the wall. Available e.g. from Osram in 60, 75 and 100W (Bruck prod. 963073 / 963072 / 963071).
